

COMP C0710 HTML & CSS

Lab 5 – Tables and Forms

Create the following Web page:

Images are available on MyCanvas in Modules ☾ Labs ☾ Lab 5.

You'll create the **seminars.html** and **reviews.html** Web pages for a company that sells vacations. Use `<span>` and `<div>` and classes where appropriate. Do NOT use inline styles or deprecated HTML elements. Change the year to 2024/2025. Use the following techniques:

- The `<title>` element should contain *Travel Seminars* or *Travel Reviews*.
- CSS styles should be as follows:
 - External stylesheet called `travelstyles.css`
 - contains the CSS required for elements that would be common to the `seminars.html` and `reviews.html` web pages, except for the nav.
 - External stylesheet called `mobile.css`
 - Contains the CSS for a responsive nav as follows:
 - Width up to 599 px should show the nav as vertical.

- Width between 600 px and 899 px should display the nav as centered

- Width of 900 px or more should display the nav as spreading with space between each tab (use the space-between justification).

- External stylesheet called printstyles.css
 - Print the web page using black color for all text, no background colours at all, and hide the nav and footer.

Print Preview for reviews.html. Yours may print on 2 pages, depending on margins and other settings.

Travel Seminars 2023/2024						
Legend:						
North America South America Asia Africa						
Schedule is subject to change						
Day	7 am - 9 am	9 am - 11 am	11 am - 12 pm	12 pm - 2 pm	2 pm - 4 pm	6 pm - 8 pm 8 pm - 10 pm
Monday	North America	Asia	Africa			
Tuesday		North America			Asia	North America
Wednesday					North America	
Thursday	Africa	Asia				South America
Friday		South America				No Seminars
Saturday	South America		North America	Africa	South America	Asia
Sunday		Africa				
Holidays	No seminars					

- Embedded styles
 - Styles that are specific to the individual page should be embedded (placed in the style element in the individual Web page). For the seminars.html Web page, embed the styles for the table and for the reviews.html Web page, embed the styles for the form.
- The colours used in the Web page are listed in the marked-up images.
- The reviews.html Web page should have the following form functionality:
 - The form should submit to **<https://csunix.mohawkcollege.ca/tooltime/showit.pl>** using the post method.
 - The default trip for Trip Reviews should be North America.
 - The value passed to the server for the duration of the trip should be 7d, 10d, 14d, 21d.
 - The value for the ratings (stars images) radio controls passed to the server should be numeric (1, 2, 3, 4, 5) and the 5 star rating radio control should be selected.
 - The comment box should be able to contain 7 rows, and 65 characters per row.
 - Types of trips the user prefers should allow the user to select more than one item, and should display all 4 items.
 - The first name and last name text boxes should restrict users to entering a maximum of 20 characters.
 - The Phone Number textbox should be able to contain 12 characters and restrict users to entering no more than 12 characters. It should also contain placeholder text 123-456-7890.
 - The email textbox should be able to contain 40 characters and restrict users to entering no more than 40 characters. It should also contain placeholder text name@example.com.
 - The checkbox for South America should be checked by default.
 - The **Send Feedback** button should submit the form data.
 - The **Cancel** button should reset the form data to the default values.
 - Include a hidden form element called **formname** with a value of **Your Name Travel Feedback**.
- Include an image showing the submitted form elements for grading purposes, as

described further in this document.

- Create the links in the nav so that Travel points to reviews.html and Seminars points to seminars.html.

****HINT: Seminars - There are 2 tables. The legend is a one-row table with a caption. ****

****HINT: The form controls may not align properly in IE. Have a look at the inline-block property.**

Submitting the Lab

1. Create a .zip file called **YourNameLab5.zip** that contains ALL files required for the lab, including subfolders with files. Upload the zip file to the Lab 5 Assignment on myCanvas.
2. On csunix.mohawkcollege.ca:
 - a) Edit the anchor tag in ~/public_html/private/index.html so that Lab Five link points to ~/public_html/private/Lab5/reviews.html. reviews.html must link to seminars.html (~ is a short form of /home/saNNNNNNNNNN)
 - b) Create the directory named images under ~/public_html/private/Lab5/
 - c) Transfer the html and image files for this lab to the appropriate locations.
 - d) Test your Lab Five link to the reviews.html file and confirm everything looks good on csunix. The work on csunix will be graded. MyCanvas is a backup, it will not be graded.
 - e) Point your browser at <https://csunix.mohawkcollege.ca/~saNNNNNNNNNN/private/>, that url will automatically display ~/public_html/private/index.html

Since all work submitted to your professor is assumed to be your own original work, you must include the following "Statement of Authorship" in EVERY file you submit for grading:

All labs must contain the authorship in the HTML source code. Place this code in the <head> element.

```
<!--      CO710 Statement of Authorship
          I F-name L-name, 000123456 certify that this material is
          my original work. No other person's work has been used
          without due acknowledgment. I have not made my work
          available to anyone else.
```

Date and General Description -->

Replace *F-name L-name* with your name and the number *000123456* with your student ID.

Place this text as a comment at the top of the code for each submitted web page

Failure to include this statement means your work may receive a deduction of a maximum of 10% of the Lab grade.

All labs must be created this semester. A lab from a previous semester that is submitted for this semester will be graded as 0.
